Craig will teach, show and we will experience:

- Why we become sick and how trauma affect our mind, body and spirit
- What hinders us from healing
- How to pray differently when healing doesn't happen
- How to pray for specific emotional and physical conditions
- Healing examples will be used
- See demonstration of healing
- Attendees to practice praying with each other
- Q and A time for specific prayer situations

For over forty-six years, Craig has been speaking, ministering, and counseling with individuals, families, and couples in medical, mental health, and church settings. Previously served in the medical profession as an Emergency First Responder, Director of Social Work at Herrick Hospital, and co-founder of MASTERPEACE Counseling, in Tecumseh, MI. Craig is currently the Founder of Insights from the Heart Ministries and ministers to the spirit and soul (mind, will, and emotions) for God to identify the root causes of trauma that block healing and restoration of challenging physical or emotional conditions and broken relationships. Craig's experience with his own miraculous physical healing deepened his passion to help people receive their own healing and restoration through teaching, imparting, and ministering about the love and healing power of Jesus.

**“The best way to learn about healing is to hear it taught,
see it demonstrated and experience it happening” - Craig Miller**
